

PRODUCT SHEET

EROAD Asset Tracking

Delivering full visibility and tracking of all vehicles and assets to maximise utilisation and productivity and provide detailed proof of service reporting.

From Heavy and Light Vehicles to Powered and non-Powered assets – our solution has all the bases covered. From the in-cab Ehubo2 – through to wired and battery powered asset tracking devices – we can ensure that you not only have visibility of your assets but the information you need to make sure they are being fully utilised and delivering on your contract commitments.

ETrack Wired

ETrack Wired is designed to take care of tracking your powered assets and equipment – when you need a full tracking and management solution but don't require the in-cab experience of the Ehubo2.

The ETrack Wired is an easily installed, discreet and durable tracking device that connects to your plant's power system and provides accurate reporting of engine hours and location with accuracy and high frequency.

ETrack wired not only covers your primary assets but also gives full visibility and tracking of your auxiliary equipment usage – including hours of usage and location tracking that enables accurate proof of service reporting and service management.

KEY BENEFITS

Full fleet tracking Visibility and management of all your assets, vehicles and auxiliary equipment

Rugged and accurate A watertight, rugged, easily installable, wired device with a small footprint that delivers superior tracking performance

Accurate Proof of Service reporting With a high level of accuracy, accelerometers, geofencing and 2 I/O ports you can connect seamlessly to EROAD Proof of Service reporting to deliver outstanding customer service

Auxiliary equipment monitoring Full visibility and tracking of your auxiliary equipment usage – including hours of usage and location tracking that enables accurate proof of service reporting and service management

EROAD Asset Tracker

KEY FEATURES

- › Superior cellular and GPS wireless performance
- › Sealed enclosure to withstand weather (IP66)
- › External surface mountable
- › Internal GPS & GPS antennas
- › Geofence and in-motion alerts
- › 2 digital inputs
- › Detailed historical activity report

About EROAD

EROAD develops technology solutions (products and services) that manage vehicle fleets, support regulatory compliance, improve driver safety and reduce the costs associated with driving. EROAD also provides valuable insights and data analytics to universities, government agencies and others who research, trial and evaluate future transport networks. This data enables those who use the roads to influence the design, management and funding of future transport networks.
