EROAD Private Mode

The EROAD Private Mode solution is designed to enable drivers of company vehicles to easily inform the Ehubo2 by a button press when they are driving while not at work so their activity is not visible in EROAD Depot for the trip.

Why use EROAD Private Mode?

In some Australian states, employers are legally obliged to not undertake tracking surveillance on an employee when they are using a company vehicle outside of work hours. Private Mode was designed to help employers meet this legal obligation. This means, when an employee turns on Private Mode, none of the vehicle's activity will be visible in EROAD's Depot Fleet Tracking or Reports.

EROAD Private Mode

Private Mode should be used when an employee is driving a company vehicle while not at work for the employer. For example, for a single trip, a day, or during an employee's weekend or holiday. The solution offers an easy, intuitive way to retain driver privacy. No location data can be viewed or is stored in EROAD Depot when the vehicle is being driven in Private Mode so drivers can be assured their privacy is being protected. For operational monitoring, Fleet Managers can schedule a report to monitor Private Mode usage to ensure drivers are using the feature appropriately. Private Mode works seamlessly alongside the regulatory features available: EROAD Fuel Tax Credits (FTC) – Automated Rebates and EROAD Fringe Benefits Tax (FBT) – Electronic Logbook.

KEY BENEFITS

› **Maintains driver privacy.** Allows employers that provide staff with company vehicles, to maintain driver privacy when the vehicle is being utilised while the driver is not at work.

› **Location of the vehicle cannot be viewed.** Provides a seamless experience for the driver with both FBT and Private Mode enabled, so that when a trip is classified Private the location of the vehicle cannot be viewed in the EROAD Fleet Management portal.

› **Supports Australian legislation.** Supports certain State-based anti-surveillance obligations for operators not to track drivers when they are driving outside of work hours.

EROAD Private Mode

FEATURES

› Easy switch on and switch off Private Mode by using a button on the Ehubo2 touch screen.

› Delivers total privacy since location data is not collected or stored when the vehicle is in Private Mode.

› Operational report available to monitor and manage appropriate use of Private Mode.

› Private Mode can be set for a trip, day, weekends or employee holiday.

About EROAD

EROAD develops technology solutions (products and services) that manage vehicle fleets, support regulatory compliance, improve driver safety and reduce the costs associated with driving. EROAD also provides valuable insights and data analytics to universities, government agencies and others who research, trial and evaluate future transport networks. This data enables those who use the roads to influence the design, management and funding of future transport networks.
