

A well managed and maintained fleet can create positive spin-offs across a range of areas for your business including:

EROAD helps you do this by:

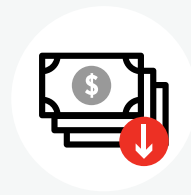

Automatically highlighting when service and maintenance is due

Minimising planning time

Capturing small defects so they can be rectified before they become big issues

Forecasting maintenance budgets

Improving fuel efficiency

Reducing idle-time

Reducing the risk of over or under-maintaining your assets

Reducing off-road downtime

Better managing your operating cost
